

- Evaluation methods have been
- reviewed. Criteria for choosing an evaluation method has been signed-off.
- The selection of an evaluation method has been signed-off.

- Method chosen has been explained to evaluation stakeholders.
- Activities or steps defined by the evaluation method are in execution according to plan and, if required, tailored activities.
- Partial results are being delivered to stakeholders.

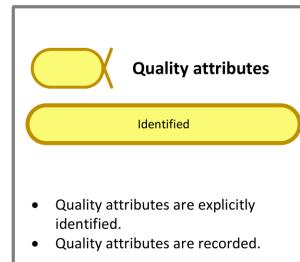

Evaluation Adoption

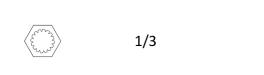

Organizational memory accrued

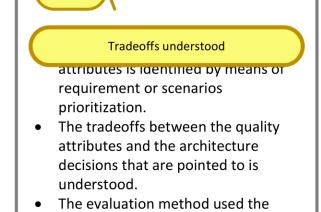

• A retrospective has been carried out.

Effort, practices, what worked well

Organizational memory has been

prioritization for focusing on

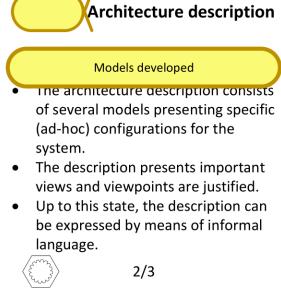

emportant quality attributes.

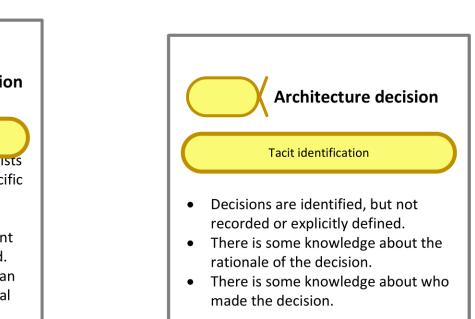

Quality attributes

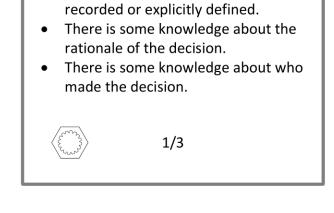

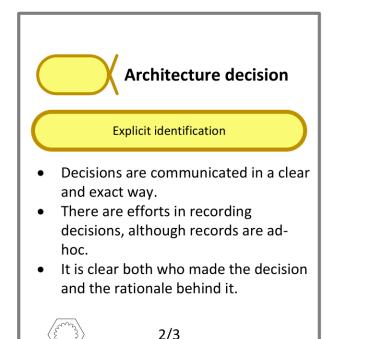

- An architecture description exists in the form of a generic overview (most of the time, this generic overview shows deployment of components). Architecture description does not
- present any specific architecture component-connector configuration.

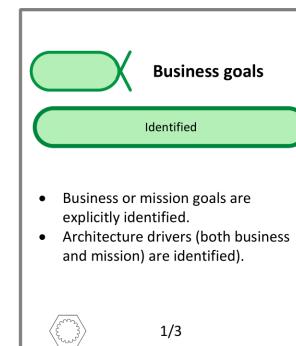

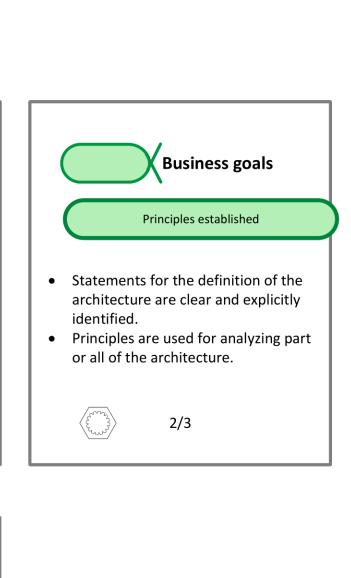

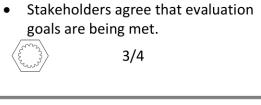

- Planned activities from the evaluation are being carried out with controlled deviation from plan. Consistent tools use.
- Consistent results from the evaluation initiative are being delivered.
- goals are being met.
